Lieber Klaus,

vielen Dank für die emails. Mit diesem Thema habe ich mich n'bis her noch nicht beschäftigt, aber 'mal sehen.
Wir treffen uns ja in Mannheim. Wann wirst Du dort sein?

Gruß,

Martin

Dear colleagues

In a recent report from a conference on post ischemic vascular damage the role of circulating endothelial progenitor cells (EPCs) for vascular homeostasis was discussed by J. M. Hill. He is currently at Bethesda. Apparently *patients with CAD revealed reduced levels and functional impairment of EPCs, which correlated with risk factors for CAD.* Perhaps circulating endothelial progenitor cells can be used as biomarkers of potential harm for CVD. Please see attached literature search. If you already have corresponding information please let me know.

Kind regards
Klaus
